Construct DV

- DV is conditional. It is the feeling thermometer score for the candidate they voted for. So DV = ftBiden if candSupport == Biden

```

# 1984 ----
nes84 = nes84 %>%
  mutate(candFT = case_when(glennSupport == 1 ~ glennFT,
                             hartSupport == 1 ~ hartFT,

Save Data with new DV
